

## Corporate Edge Announces Certification as a Minority-owned Business Enterprise

*Certification Speeds Contracting Process and  
Ensures Companies Meet Supplier Diversity Goals*

**San Francisco, CA - May 14, 2010** – We are pleased to announce our certification as a Minority-owned Business Enterprise (MBE) by the California Public Utilities Commission’s (CPUC) independent certifying body, the Supplier Clearinghouse.

Certification allows our firm to be listed as an eligible MBE provider in the Supplier Clearinghouse public database, which is accessible to utilities as well as privately owned companies. By accessing eligible providers through this public database, companies can more quickly meet their diversity goals. Certification also accelerates the contracting process between providers and procurement.

“Many companies are implementing diversity initiatives as a critical component of organizational strategy. We are pleased to be officially recognized as a minority-owned business enterprise by the CPUC as it strengthens our ability to serve the business needs of our clients on more than one level,” said Michael Takagawa, CEO.

Our certification is currently valid through May 13, 2013. Our firm profile can be located in the Supplier Clearinghouse public database: <http://www.cpuc.ca.gov/PUC/SupplierDiversity/database.htm>
